SOFTWARE AND TECHNICAL PROJECTS

Analysis of Ear Frequencies and Mean Absorbance

- Extract ear frequency data from 12 studies with SQL
- Examined gender-based variations in mean absorbance using R and produced visualizations

Permutation Test Across March Madness Dataset

- Performed a right-tailed permutation test to determine probability of low-seeded teams defeating high-seeded teams
- Visualized the null distribution of the dataset using R, enhancing the interpretation of test results

Analysis of Netflix Movies and TV Shows

- Applied regular expressions in R to categorize television genres and identify the most frequently occurring titles.
- Created an interactive genre visualization using Plotly, enhancing data exploration and engagement.

LEADERSHIP EXPERIENCE

Pomona Pitzer Division Three Women's Lacrosse Team | Claremont, CA

August 2023 – Present

Midfielder, Freshman Captain

- Participated in 20 hours of practice/week over a 5-month season, culminating in teams' advance to NCAA Elite 8
- Selected as one of two freshman for the leadership team, bridging communication gaps between coaches and players
